

Wing

Motorised swing gate turnstile

Elegant quality.

Harmonious, elegant, silent and quick
Wing features numerous qualities! It fits perfectly in even the most prestigious settings such as hotels, business facilities, casinos, showrooms, and fitness/wellness centres. It is designed to ease passage for physically challenged people.

Double version.
Wing is also available in the double version for extra wide passage ways.

Flow management.
To better manage flows you can integrate Wing with the modular post and rail system.

Perfect integration.
Opens via command device, and can be integrated with Came's access control systems. It allows you to clear only authorised personnel to restricted areas.

24V only

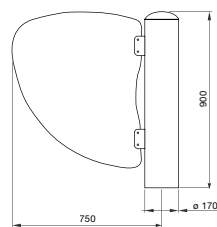

Its 24V power rating makes for easier installation and also guarantees enhanced safety for users.

Advantages of Wing

Wing is the bidirectional, motorised swing gate, featuring an AISI 304 Inox steel structure with IROKO wooden cover – and a 10 mm thick, transparent, polycarbonate swing-leaf. It's extremely versatile in that the leaf's design may be customised to your liking, while the materials used to make it suitable for every situation. Wing is fitted with a timed closure and a push-to-open antipanic system. For those wider passage ways. It's also available in double configuration, employable at wider passage ways.

Dimensions
